

ABSORPTION ACTIVATOR

SideKick is specifically formulated to provide a blend of ammonium salts enhancing the performance of certain herbicides, especially under adverse environmental conditions or where antagonistic cations are present in the spray mix. Used at recommended rates, SideKick can improve the performance of herbicides where ammonium based additives are included. Additionally, SideKick provides specific polymers as an aid to deposition as well as an integrated anti-foaming agent to minimize spray tank foam.

Active Ingredients and Analysis:

Phosphate Ester of Polyglycols,	
Diols and Defoamers.....	9.0%
Blend of Ammonium Salts	33.9%
Invert Ingredients.....	58%

Mixing Instructions

Add SideKick to the spray tank in accordance with the instructions found on the herbicide label. Check compatibility of the proposed spray mix in a test jar before full scale mixing. Follow all label instructions for use rates, timing, mixing procedures and crop restrictions.

In the absence of a specific mixing instructions, fill the spray tank to 1/3 to 2/3 full with clean water. While the water is agitating, add the required amount of SideKick and herbicide to the spray tank. Add the remaining water and continue agitation until the entire mixture is integrated.

Seller warrants that the product conforms to its chemical description and is reasonable fit for its stated purpose on the label when used in accordance with directions of use but neither this of merchantability of fitness of a particular product contrary to label instructions or under abnormal conditions, or conditions not reasonably for seeable to the seller, and buyer assumes the risk of any such use.

Use Rates

1 to 2 quarts per 100 Gallons of water.
